

Benefits

1. effective lubrication
2. excellent corrosion protection
3. weather resistant

Product Description

BIZOL Chain+ L53 is a spray to lubricate chain-driven transmissions under exceptionally high strain. BIZOL Chain Grease can be used like oil with the properties of grease with outstanding mechanical and thermal stability and is dirt repellent. It is weather resistant, hydrophobic and pH-neutral. It comes with an additional spray nozzle and an extension tube in the cap.

Available Packages

400 ml Art. 80003

Technical Data

Name	Value	Method
Basis	Mineral Oil	
Colour	Transparent	
Scent	Characteristic	
Relative density at 20°C	0,844 g/ml	
Temperature resistant	-50-+200 °C	
pH-Value	Neutral	

WITH

WITHOUT

Applications

Spray on chains, heavily loaded chain drives, conveyors, bicycle chains.

Usage

The aerosol should have room temperature. Best processing temperature 5 to 30°C. Before use, shake the aerosol. Apply industrial chain grease in a thin layer. During the initial flow phase, when the spray can really penetrate the treated chain, the spray has a foaming effect. Optimum lubrication is obtained after evaporation of the solvent.
